DAC Express for Windows or iPad

#### **Overview**

The new Remote Ordering module for Supply Logic will allow distributors running the Supply Logic software the ability to send in orders from the field. Imagine your sales force being able to create orders at a remote store location by scanning the bar codes of the products their customer needs to order. Imagine giving your customers the ability to send in their own orders and the time saved by not having to re-key the order. Imagine giving your corporate account the ability to send in orders for all chains under their corporate umbrella. DAC Express is the tool that can be used by Sales Reps, Customers and Corporate Customers to send in orders to Supply Logic remotely.

DAC Express can be installed on a computer running Windows. Install it on Windows 7, Windows XP, Windows Vista, etc. Install it on 64-bit or 32-bit computers. Install it on laptops and netbooks and carry it around the warehouse or retail store to scan the products directly off the shelves. Install it on an iPad to really impress your customers.

Scanning is only one way to get items on the order: file importing and device loading are other viable options. The windows version lets you use the Opticon 2001 data collection scanner to upload items to DAC Express. The scanner is the size of your thumb and can hold thousands of barcodes. Create an order and load all scanned items with a press of the button. The iPad version uses the Opticon 2002 Bluetooth barcode scanner attached as a keyboard wedge.

DAC Express is available to iTunes App Store download on 10/1/2012. It's a free application that can run on an iPad I, II or III. Use the app in Trial Mode to see how easy it is to create orders. The app uses our samples database of customers, items and barcodes so you can see how DAC Express functions. If it fits your needs, contact us at <u>DESupport@CDRSoftware.com</u> or call 985.626.8404 x321 to schedule a demo or information on how to use it with your own server.

## **DAC Express iPad Version**

The customer screen shows all customers you've sent in orders for. The Current section shows the current order you're working on. Highlight the customer to view their location on the map.

Press the Orders button in the tab bar to review all orders for the highlighted customer.

Press the Settings button in the tab bar to set up the connection to your Supply Logic database.

	Search						

Use the Opticon 2002 Bluetooth scanner to quickly scan the items you need to order.

When entering off a list, the heads down entry screen toggles between entering item and quantity.

Use the Search feature to look for items that don't have a barcode or require special attention.

The start screen shows all orders that haven't been sent in to the host server. Create orders with or without an internet connection and send in the orders when one becomes available.

DAC Express uses 3 files that are updated daily to insure up-to-date information.

Click the Send button to send in all orders at once.

	m# or UPC		_	Qty Unit		Find
Line	WhseCd		Unit	ItemDesc	Qty	
6	1	306557	0	WHITE OWL BLUNT GRAPE	50	
5	1	303778	0	WINCHESTER LITTLE CIGAR	60

Load Qear						

Adding lines to the order is simple. Click the Load button to import from the Opticon 2001 data collection scanner, CSV or text file.

Heads-down entry is possible and preferred when entering off an existing handwritten list.

Search when the barcode fails to scan or doesn't exist.

DAC Express for Windows or iPad

### **Licensing of DAC Express**

DAC Express uses the Remote Ordering module in conjunction with DAC Express. The Remote Ordering module is a separate program that needs to be licensed and installed on the same network as your Supply Logic server. It will create the data files used by DAC Express daily and publish them so DAC Express devices can download and create orders. It will monitor the orders folder and import those orders in the Supply Logic system. The module costs \$1,000 with a quarterly maintenance fee of \$50. Each device that runs DAC Express uses 1 license. Each Windows license costs \$250 and each iPad license costs \$300.

For example, an existing Supply Logic customer can license DAC Express for a one-time fee of \$1,000 plus any number of user licenses as shown below:

٠	5 Windows Users	\$1,250 (one-time fee)	\$ 62.50 quarterly
٠	5 iPad Users	\$1,500 (one-time fee)	\$ 75.00 quarterly
٠	Windows-1; Apple-1	\$550 (one-time fee)	\$ 27.50 quarterly
•	1 Windows User	\$250 (one-time fee)	\$ 12.50 quarterly
•	1 iPad User	\$300 (one-time fee)	\$ 15.00 quarterly

So the initial investment for a distributor wanting to use DAC Express on 1 Windows devices and 1 Apple devices is \$1,550. The quarterly maintenance fee will be due the quarter immediately after the quarter it was licensed.

•	One-time fee	\$1,000 (RO module) + \$550 (mixed 2-pack) = \$1,550
---	--------------	--

• Quarterly fee \$50 (RO module) + 27.50 (mixed 2-pack) = \$77.50

## **CDRs Commitment**

CDR is committed to bringing the latest technology to our customers. The development effort was extensive in creating DAC Express and getting it to work with Supply Logic. It is something our customers have been asking for and we hope they will see the potential in using it as their remote ordering solution. Please contact us at <u>DESupport@CDRSoftware.com</u> or 985.626.8408 x321 for more details.
